

Boots on Ground event

27 May
2025

Catch water & restore landscapes

Learn how to apply simple strategies to improve productivity and drought resilience. Extend your wet season, grow more grass.

Territory NRM and Mulloon Institute invite you to get hands-on with a property-scale land restoration project. We'll hear from our host about how they designed their project to be achievable, economical and effective. We'll share a meal, take part in construction and enjoy ourselves while gaining practical skills.

This is stage 3 of the Communities of Practice Project, where land managers receive expert mentoring to implement a drought resilience project using natural infrastructure and farm system solutions.

Hosted by Fiona McBean (winner of the Farmers and Fishers Sustainability Award from the 2024 NT NRM Awards). Full address supplied upon registration.

Mulloon Institute is a leading research and education organisation helping to build resilient regional communities by supporting the long-term, sustainable growth of Australian agriculture.

Presenter

Lance Mudgway
Landscape Planner,
Hydrologist
